

Marko Haiduk

Full Stack Developer

Mevaseret Zion • 053-430-81-94 • haidukm95@gmail.com • [GitHub](#) • [LinkedIn](#)

Professional Summary

Full Stack Development student with hands-on experience building web applications using **JavaScript, HTML, CSS, Python, SQL, and REST APIs**. Developed multiple projects including interactive web apps, API-based tools, and dynamic interfaces using **DOM manipulation**. Fast learner with strong problem-solving skills seeking a **Junior Web Developer position** to contribute and grow in a professional development team.

Technical Skills

JavaScript • Python • SQL • HTML5 • CSS3 • REST APIs • DOM Manipulation • PostgreSQL • GitHub • Backend • React • Redux • Typescript • Authentication (token and encrypting) • Deployment

Technical Projects

Currency Converter Web App

Web application that converts currencies using live exchange rates.

- Built using **HTML, CSS, and JavaScript**
 - Integrated external **currency exchange API**
 - Implemented dynamic conversion for **170+ global currencies**
- [GitHub](#)

To-Do List Web App

Simple task management application with dynamic interface.

- Built using **JavaScript, HTML, and CSS**
 - Implemented **DOM manipulation** for task creation and completion
 - Developed interactive UI allowing users to manage daily tasks
- [GitHub](#)

Stories App

A mini social media-shaped app. It gives possibility to create a personal account, add other users to friends, create stories (as a post in user's account feed) personally or collaborating with other users, edit the stories with a new version saving or discard edited version or delete a story completely.

- Created backend server logics with models, controllers and routes for all the app's operations
- Implemented standart user authorization with a token
- Created frontend side on React+Redux+Typescript platforms
- [The App's link](#)
- [GitHub](#)

Warehouse App

Application for warehouse logistic operations logging and inventory inspection. Multi-user, suitable for small warehouses (usually no more than 10-15 personnel, technically unlimited), available from either PC or tablets/smartphones for each warehouse employee

- Created backend server logics with models, controllers and routes for authorization, logistics, goods registry, inventory checking, personnel handling operations.
- Implemented user authorization with a token which gets expired after a dedicated inactivity time
- Created frontend side on React platform
- [The App's link](#)
- [Github](#)

Professional Experience
